The game.. doesn't work.

It launches and then crashes soon after with a blank gray screen.

Not only does it not work, but about 10 - 20 seconds into the blank gray screen, I get a popup on steam for a VR game by "Prism Development" or something. I don't entirely understand what's going on, but the game's broken.

Couldn't change the text to English.

Gameplay is terrible.

Just a bunch of not-fun assets tossed together.

Stay away.
